## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1, 11 and 13-16 are objected to because of informalities, which can be corrected as follows: In claim 1, line 16, insert –out— after “standing.” In claim 11, line 3, “or” should be replaced by –and--. In line 2 in each of claims 13-16, insert –a— after “in.” Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to base claim 1, line 7, “the next parallel to the guiding groove of the magazine” is unclear and lacks antecedent basis. Also with respect to claims 9 and 13-16, “the guiding groove of the clips” lacks antecedent basis (Should it be “the guiding groove of the magazine”?). With respect to claim 10, “the guiding groove of the magazine” lacks antecedent basis.

### ***Allowable Subject Matter***

4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 3731

5. Claims 2-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record, alone or in combination, discloses an instrument for placing U-shaped clips, where the instrument includes, inter alia, a magazine with a feeding plate that, in a region arranged distally to a contact point of a pushing device, has a middle section that stands out downwards at a distance from the clips and, in a region arranged proximally to the contact point of the pushing device, has a middle section that stands out upwards at a distance close to the clips.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mayenberger et al. (5,843,097) teach a clip applier with a feeding plate.
